Afternoon Sean.

The only document that might come your way to look at is DEQ's review of the NW Natural's approach to evaluate transducer data versus manual measurements for purposes of HC&C system performance monitoring.

Thanks for checking and have a great time while out-of-office.

Dana

Sean, the Draft Pre-Remedial Basis of Design Technical Evaluations Work Plan is

expected on July 20th. Other than that I am not sure of any Gasco-related items on the horizon. If you'd like CDM Smith to get going right away with review comments I can suggest a 24 hr LOE that would let us get started (and could be revised if needed once we see the full scope of the deliverable).

Lance, Dana, could you let me know what efforts might be planned over the next 3 weeks, such that I can pre-approve any necessary CDM efforts?

Thank you.
